

OBJECTIVE MIND readily comes under the disciplining influence of the SUBJECTIVE MIND. But unfortunately, except for a rare few, the majority of us have minds that are split. This split between the SUBJECTIVE and the OBJECTIVE aspects of our mind is mainly created by the layer of egoistic desires in the individual. The greater the distance between these two phases of the mind, the greater the inner confusion in the individual, and the greater the egoism and low desires which the individual comes to exhibit in life.

Through the five "gateways of knowledge," the organs of perception, all of us experience the world of objects around us at all moments of our waking state. The innumerable stimuli that react with our sense organs (receptors), create impulses which reach the OBJECTIVE mind and these impulses filter deep down to the subjective stratum through the intervening layers of individual ego-centric desires. These impulses, thus reaching the SUBJECTIVE mind of a person, react with the existing impressions of his own past actions that are carefully stored away in the subjective layer and express themselves in the world outside through the five organs of action (effectors).
